

## Highlighting Polygons

The screenshot shows the software interface for highlighting polygons. The top menu includes 'LOCATE AN AREA', 'DEFINE PRODUCT', 'EXTRA INFO', and 'MODIFY'. The 'EXTRA INFO' tab is selected, showing the 'OS SITEMAP POLYGON SELECTION mode'. The interface includes a toolbar with icons for 'Add Geometry', 'ZOOM IN', 'ZOOM OUT', 'UNDO', and 'REDO'. A central compass rose is visible. Below the toolbar, there are instructions: 'Before selecting your OS Sitemap polygon, choose... Use Standard OS Sitemap colour infill palette Or Change to'. The 'Or Change to' section includes options for 'Line thickness' (set to 2), 'Colour of outline' (Black), 'Colour of infill' (GhostWhite), and 'Area measurement' (No area measurement). Below this, there are fields for 'Name your OS Sitemap polygon' and a 'DELETE' button for 'Deselect OS Sitemap polygon'. The map on the right shows a street layout with a yellow circle (4) highlighting a specific polygon. A pop-up window displays mapping information for the selected polygon: Centre: 518193E 203704N, Extent: 216m x 183m; Area of interest information: Centre: 518162E 203691N, Extent: 307m x 276m, Orientation: 0.0deg; Selected object information: Type: OSSitemap Polygon, Area (Hectares): .004, Total Line Length (KM's): .027.

## Sitemap Customised PDF

### Polygon Selection

While in the 'Sitemap Customised PDF' product – there is the facility to highlight specific polygons (such as buildings or whole land plots) for emphasis or for Area Measurements.

To do this:

- (1) Choose the 'Extra Info' tab – as shown above.
- (2) Then choose the 'OS Sitemap Selection mode' icon – it has a 'plus' symbol on it.
- (3) As instructed on screen, also choose your colour options, line thickness and Area Measurement (if required)
- (4) Click with your mouse on the polygons you want highlighted. Press and hold on the 'CTRL' key while selecting polygons to make any 'multiple' selections.
